

Under 10,000X magnification, the web of nanofibres forms a barrier to tiny dust mites and their droppings, and the manuka extract in the fibres helps reduce bacteria and allergen build up.

A Nanodream nanofibre pillow lining is ideal for anyone suffering from asthma, allergies or respiratory problems.

**DUSTMITE
BARRIER**

**ANTI-
BACTERIAL**

**MANUKA
EXTRACT**

**BREATHABLE
LAYER**

The Nanodream pillow lining is truly a revolution in healthy sleep. Through a process called electrospinning, we are able to create a barrier layer of fibres so microscopic they keep out even the smallest of allergy causing dust mites.

Dust mites and their droppings are bad news for anyone with allergies or asthma, and they typically inhabit bedding and pillows. The Nanodream pillow lining eliminates this issue not only by creating a natural barrier to dust mites, but also by adding antibacterial manuka extract to the electrospun lining, further helping to keep your pillow free from unhealthy allergens, bacteria and fungi.

Enjoy a healthier sleep, free from unwanted pillow-bound nasties.

How NanoDream Works

Dust Mite

Dust Mite Droppings

Standard Pillow Case

Under a microscope, you can see the strands of conventional fibres used in standard pillow cases easily allow dust mite migration.

Microfibre Fabric

Standard microfibre fabric is made up of much finer strands of fibre, yet still not small or dense enough to prevent dust mite migration.

NanoDream Pillow Lining

The NanoDream electrospun nanofibre layer is so dense it creates a natural barrier to dust mites through size exclusion.

Did you know? Over two years regular use, it is estimated that 10% of the weight of a pillow is dust mites and their droppings.*

* www.ehso.com/ehshome/dustmites

Stops dustmites in their tracks while remaining breathable for a comfortable sleep.

Instructions

1. **Unfold your Nanodream pillow lining, and open the zip.**
2. **Insert your pillow without any extra material covers.**
3. **Close zip and cover your pillow with your standard pillow case.**
4. **Enjoy a healthier sleep.**

Note: For a completely fresh sleeping experience and optimum results we strongly suggest a new pillow is purchased along with your Nanodream pillow lining purchase. We also suggest you change/wash your standard pillow case every 2 weeks and leave to dry in direct sunlight.

Nanofibres - small and safe

Revolution Fibres produces extremely fine fibres that are extremely long, and tightly bound to each other to form a dense, lightweight fabric. These are not nanoparticles and are made of medically-approved, non hazardous polymers, infused with the goodness of manuka extract to ward off bacteria and allergens.

Care Instructions

Nanodream Pillow Liners do not require regular washing. However if a wash is necessary: hand wash or machine wash on delicate cycle **separately**. Do not tumble dry or iron.
